Job Description

We are looking for engaging individuals to teach **STEAM** related subjects to K-5th grade students, **after school**, in a classroom setting. If you love STEAM and feel you can make learning STEAM fun for kids of all ages, then you have probably found the perfect job.

Currently, SciGenius is looking for **STEAM** instructors who are willing to teach a minimum of 2.5 hours every week.

- A great job for college students with a STEM or Coding background or part-time job seekers interested in gaining teaching experience and learning about inspiring students through Robotics. Classes meet every other week for 2.5 hours.
- Classes start time will range from 2:30 PM – 4:30 PM

STEAM Instructor responsibilities:

- Provide instruction and facilitate STEM classes and activities for grades K – 6th grade.
- Manage students' academic performance.
- Provide feedback to parents after working with students.
- Prepare for classes by reviewing lesson plans.
- Maintain the safety of students.
- Pick up equipment from our local facility and travel to assigned locations.
- Ability to make **STEAM** fun!
- Encourage connections between problem-solving and real-life problem-solving
- Paid training & uniform included
- Utilize curriculum, teaching tools, and other materials provided by SciGenius.

- Maintain regular communication with Program Coordinator and other staff
- Prompt, punctuality, and responsible conduct are requirements when working with children
- Be a positive role model for your students
- Be a proud representative of your own character as well as SciGenius
- Responsible for the space and materials prior, during, and after the class sessions.
- Excellent organizational, verbal, and writing communication skills.
- Patient, positive and friendly attitude.
- Have a passion for STEM education.
- Must be fun to work with and like working in fast-paced environments where requirements can change frequently.
